DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-2, 5-8, 10-17, 19, and 20 have been considered but are most in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-2, 5-8, 10-17, and 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art in this application in view of Inoguchi et al. (US5292682).

With respect to claims 1-2, 5, 8, 10-14, 17, and 19-20, Prior art shows in Fig.2 (Jepson Claim style) a semiconductor laser comprising an active region which includes at least a QW layer and upper and lower waveguide layers, the QW layer, the upper waveguide layer, and the lower waveguide layer being formed of InGaAsP and upper and lower cladding layers each being formed of AlGaAs. Prior art lacks the thickness of the waveguide layer, part of the upper cladding layer on the upper waveguide layer is selectively removed, and the current blocking layer. Inoguchi teach in Fig.10 part of the upper cladding layer 35 is selectively removed, the

Application/Control Number: 09/315,068

Art Unit: 2828

current blocking layer 34, and the thickness of the waveguide layer at 0.3 um (col.3, 1.24-25). For the benefit of enhancing the long reliability of the semiconductor laser, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Prior art part of the upper cladding layer is selectively removed, the current blocking layer, and the thickness of the waveguide layer greater than 0.25 um as taught by Inoguchi.

With respect to claims 6-7 and 15-16, Inoguchi disclose the thickness of the upper cladding layer at 1 um (col.3, l.38-39).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Communication Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung (Michael) T Nguyen whose telephone number is (571) 272-1949. The examiner can normally be reached on 8:30 - 17:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Ip can be reached on (571) 272-1941. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 306-3329.
